Program Title		“Participatory Management”	
Hours	3 - 5	Presentation Format:	Microsoft PowerPoint
Course Description		Develop teams that really work together by encouraging input that matters. Create goal centered activity by valuing specific contributions each member has to offer, resulting in higher productivity and morale. Enhance the “ownership” of projects by each involved team member, furthering their commitment to excellence.	
Highlights		Learn what it takes to create a management style that produces high productivity and good morale. The benefits of this program are vast. Consider the possibilities and advantages of having team members who produce a work product that radiates pride, demonstrates competency and highlights accomplishments.	
Special Points		Participants will: <ul style="list-style-type: none"> • Be able to implement the SWOT assessment in each project • Recognize the difference in behavioral and procedural norms • Apply the team life cycle model to work groups to enhance performance • Diagram the lifecycle of a team • Discover the benefits of instituting the goal of inclusion in all work groups • Learn the differences between roles and skills • Determine the necessary intervention signals • Learn the mandatory 3-C’s of Participatory Management
